

[AED UNITS]

Sudden cardiac arrest can strike anyone at any time...

Is your office rescue-ready?

ZOLL's AED Plus® is the first and only Full-Rescue AED. Not just a defibrillator, it provides Real CPR Help® so infrequent rescuers can "push hard, push fast" as recommended in the AHA's 2005 Guidelines for CPR.

and it's never expected.

[WELCH ALLYN]

You'd never think a trip to your office could turn into a life and death situation. Be prepared for when it does.

"I never thought I'd need an AED in my office until I had to save the life of a patient who came in only for a consultation. Now, no matter where I work, I'll always have a Welch Allyn AED nearby."

—Christopher J. Saal, D.D.S., M.D.
Oral and Facial Surgery Center, Houma, LA

Going to the dentist should be a routine visit. And most of the time it is. But, adverse reactions to drugs or other factors can make that routine event anything but routine. When an emergency situation arises, make sure you're prepared with a Welch Allyn automated external defibrillator.

The Welch Allyn AED 10™ provides simple text and voice instruction to give you and your staff the confidence to save a life. And, since Welch Allyn has been helping physicians for almost 100 years, you can trust the AED 10 when you need it most.

See how the Welch Allyn AED 10 can help you and your staff keep your patients safe by calling customer service at 1.866.892.8361.

WelchAllyn®

Advancing Frontline Care™

The ADA Council on Scientific Affairs' acceptance of the Welch Allyn AED 10 is based on its finding that the product is effective in treating patients in ventricular fibrillation, a common cause of sudden cardiac arrest, when used as directed.
