

ProDrive System

ProDrive System: Designed as a performance upgrade for current handpieces, the ProDrive System is the world's first turbine and bur locking system proven to improve the performance of high-speed handpieces. The ProDrive System's patented, triangular bur shank enables the turbine to lock the bur into place resulting in greater bur retention, providing superior torque transfer, smoother handpiece operation, and improved overall control.

The ProDrive line now includes ProDrive Handpieces, ProDrive turbine upgrades for Midwest, KaVo, Star, Sirona and W&H(A-dec) handpieces, ProDrive diamonds & carbide burs. Ask your Nashville Dental account representative for more details or for a demonstration or visit www.prodrivesystems.com.

Endless Possibilities Electrified

MAKES YOUR PRACTICE PERFECT®

Round, Evolved.

Upgrade your handpiece. Evolve your practice.

ProDrive, the Logical Evolution in Dentistry.

Unlike traditional friction grip design, ProDrive's revolutionary upgrade turbine and triangular bur system lock together for noticeably improved cut performance, superior control and improved precision.

You can experience ProDrive two ways, the ProDrive Upgrade Turbine for leading brand handpieces, or the ProDrive High-Speed Handpiece (standard or mini head). The ProDrive High-Speed Handpiece is the only handpiece to incorporate the ProDrive Turbine. Both options work with the triangular shank ProDrive Bur which is specifically designed to engage with ProDrive Upgrade Turbines and ProDrive High-Speed Handpieces.

Experience faster cutting, superior control & improved precision.

Evolve your practice. For more information or to place your order, contact your local Nashville Dental representative or call 1-800-251-2196 | www.prodrivesystems.com
