Coltène/Whaledent Hyflex® CM Niti Files

Controlled Memory NiTi Files

Extremely Resistant to Separation & Highly Flexible

HYFLEX® CM NiTi Files with Controlled Memory Effect are up to 339% more resistant to cyclical fatigue compared to standard NiTi files, reducing the incidence of file separation.

Superior Canal Tracking

HYFLEX® CM NiTi Files have been manufactured utilizing a unique process that controls the material's memory, making the files extremely flexible, with no re-bound. This enhancement in NiTi file production technology gives the file the ability to more closely follow the anatomy of the canal, reducing the risk of file separation, binding and complications such as ledging, transportation, and perforation.

Easy To Follow File Sequence

HYFLEX® CM NiTi Files come with a recommended sequence of 4-6 files depending on the size of the root canal, making the procedure straightforward and easy to follow.

Ask your NDI Representative for more information or for an in-office demo.

See Pages 26-28 for more information and detailed ordering information

CanalPro Irrigation System

Endodontic Irrigating Solutions

Saves time and improves outcomes

- More efficacious solutions
- Innovative delivery instruments
- Color-coded for safety and convenience

When it comes to irrigating, Canal Pro Endodontic Solutions are your best choice for successful treatment. We have engineered our endodontic solutions to optimize the time spent on irrigation, giving you the best approach to cleansing canals and the BEST OUTCOMES.

Quala Core Build-Up Material

Quala Core Build-Up Material is a dual cure resin composite used for the construction of core build-ups. Flows conveniently, and stacks without slumping – offering easy placement. The dual cure formulation allows complete curing. Contains Fluoride. Packaged in a convenient automix syringe.

Q40201 Core Build-Up Material, Dual Cure, Universal Shade
Contains: 2 x 9g automix syringes (4.5g base & 4.5g catalyst); 20 mixing tips; 20 intraoral tips

Q40202 Core Build-Up Material, Refill Tips
Contains: 20 mixing tips (for 5ml syringe); 20 intraoral tips (1.2ml)

Q40201 - **\$34.99**
Q40202 - **\$14.99**

carbide burs

Carbide Burs

Provide superior cutting performance of restorative materials. The shank of each bur is nickel or gold plated to protect against corrosion and to provide a firm grip in the handpiece. Variety of shapes and sizes allows for more flexibility in performing procedures. Available in 10 packs and 50 packs based on select styles. Autoclavable.

diamonds

Diamonds

Variety of shapes and grits for more flexibility in performing procedures. Diamond particles are uniform in coverage for optimal cutting performance, less heat and a longer lasting diamond. A concentric stainless steel shank means minimal runout, greater stability at higher speeds. Available in Multi-Use & Single-Use with grits ranging from Fine to Super Coarse.

noteworthy & new

A collection of new and/or upgraded products

Air/Water Syringe Tips

Easy-to-use disposable syringe tips require no adapter. Two chamber construction with separate air and water eliminates water in air chamber. Unique four-vent air channel design ensures immediate dry air without cross-contamination and provides optimal air and water spraying power. Beveled ends, no sharp edges. Latex-free.

| Features | Benefits |
|---------------------------|---|
| 2-chamber construction | Eliminates water in air chamber |
| 4-vent air channel design | Ensures immediate air without cross-contamination |
| Beveled ends | No sharp edges; patient safety |
